

DO YOU NEED HELP?

**Natural disasters create an opportunity
for employers to exploit workers during
relief and rebuilding efforts.**

Were you promised a job to help with disaster relief efforts that turned out to be different than what you thought?

Are you being made to work extra hours without breaks or to work in unsafe conditions?

Are you living in employee housing that is unsafe, unsanitary and/or neglected?

Are you getting paid the amount you were promised?

Were you told you owe money to your employer to cover costs for travel, food, housing or other reasons that you do not understand?

Does your employer keep your personal documents (I.D., tax forms, etc.)?

Are your movements or conversations being restricted?

Are you being threatened if you don't meet the expectations of the job? Do you feel like you cannot safely leave your situation?
